Title:
Expired OTP is accepted without validation error.

Description:
Ensure that OTP becomes invalid after expiry time and the system shows proper error messages.

Steps:

1. Go to Sign Up
2. Enter all fields that need to be completed Sign up.
3. After completing all steps a otp sends to the user phone.
4. Wait for OTP expiry time (e.g., 1–5 minutes)
5. Enter the expired OTP.
6. Click on verify.

Expected Result: System should show error message (e.g., *"OTP expired"*)

Actual Result: The system accepts expiry OTP code and login in the system.

Title:
"Didn't receive the OTP?" option is not functioning properly

Description:
The "Didn't receive the OTP?" option does not work as expected. When the user clicks on this option, the system fails to resend a new OTP or does not provide any proper response or feedback.

Steps to Reproduce:

1. Go to Sign Up / Login page
2. Enter a valid phone number
3. Complete initial steps to receive OTP
4. Navigate to OTP verification screen
5. Click on "Didn't receive the OTP?" option

Expected Result:
System should resend a new OTP to the registered phone number and display a confirmation message (e.g., "OTP resent successfully").

Actual Result:
The system does not resend OTP / no response is shown / option is not working properly.
